

INTEGRATE MARINE CHARTS WITH SST AND SEA COLOUR CHARTS

Sea surface temperature and sea colour charts can be exported from our web site www.seasurface.com and then imported into the new **Memory-Map QuickCharts** navigational product and synchronised with the many types of national and state organisation marine charts included with the product. It can be used on your PC, laptop, Pocket-PC or Windows Mobile Smartphone. With a GPS connected you can also show your GPS track/position on both the images and charts simultaneously. This provides the benefit to anglers of knowing exactly where you are in relation to the latest sea surface temperature and sea colour information.

With **QuickCharts**, and the Import Maps license extension, installed on your laptop or on-board computer all you need do is export the latest SST or sea colour image and point QuickCharts to the file. It's that easy!

Memory-Map QuickCharts comes complete with software plus a range of national and state organisation's supplied marine and hydrographic charts. Three packages are available covering;

- The West Coast;
- The East Coast; or
- Whole of Australia.

Special Discount Offer

We are pleased to offer all of our customers a special **20% discount** on copies of the **Memory-Map QuickCharts** software only (see the order form below).

There is also a special section on the user manual on our web site www.seasurface.com (**How to use SST**) on downloading and importing images into **Memory-Map QuickCharts** and how to synchronise them with the QuickCharts included charts.

Other Memory-Map Products

Memory Map also offers a range of land based mapping products complete with powerful navigation tools for use on your PC, Pocket PC, iPhone and Windows Mobile Smartphones. Details on all these products can be seen by going to www.memory-map.com.au . Copies can also be purchased from us with the same discounts applying as for **Memory-Map QuickCharts** (See the order form below).
